2010 DATA CHANGES ALERT

Attention CNExT Users

- C/NET Solutions is currently the only approved vendor for 2010 (see http://ccrcal.org/PDF-DSQC/SOFTWARE_VENDOR_APPROVAL-2010x.pdf).

- The new forms editor (multi-form) will not be available until after the first of the year.

- Users must convert over to the 2010 version of CNExT by December 31, 2010, or your facility will be out of CCR compliance.

- Once your database has been converted and corrections made, your facility must begin transmitting cases.

- Users can switch over to the forms editor as soon as it is shipped, or back and forth depending on staff member preference.

- C/NET staff are ready to support your conversion now - do not delay into the second half of December, when your IT and CNExT support may be problematic.
